

Thornton & Ross Ltd, Linthwaite, Huddersfield, HD7 5QH

Coping with Chickenpox

Would you and your colleagues like to have a free update on the treatment of the symptoms of Chickenpox?

This condition affects over 600,000 children a year

We will review the aims, objectives and limitations of all available treatments

This will be achieved in a session of 20 to 30 minutes
(sponsorship for catering costs is available)

This can be an integral part of an existing meeting you have planned or we can organise a meeting to fit in with your local needs.

Audience members who would benefit from this training include health visitors, school and nursery nurses, infection control nurses, pharmacists and school teachers.

If this is of interest please contact the person overleaf in your geographical area.
